Summary

Computer Science undergraduate with strong skills in Java, Data Structures & Algorithms, Spring Boot, RESTful APIs, SQL, and React.js. Experienced in building full-stack web applications and collaborative systems. Passionate about backend development, problem-solving, and developing scalable software solutions.

Technical Skills

Languages: Java, C

Backend: SpringBoot, RESTful APIs, Spring Security, JWT Authentication

Frontend: HTML, CSS, JavaScript, React

Database: MySQL

Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, computer Networks

Tools: IntelliJ IDEA, VS Code, Eclipse, Git, GitHub, Docker, Postman

Projects

Distributed File System

Tools Used: Java, Spring Boot, Spring Security, React.js, MySQL, JWT, Git

- Developed a secure, scalable file storage system using Java, Spring Boot, React.js, and MySQL.
- Implemented authentication and authorization with Spring Security, JWT (access & refresh tokens), BCrypt, email verification, and session management.
- Built a Policy-Based Access Control (PBAC) system with group roles (Admin, Dominant, Guest) for fine-grained permission handling.
- Implemented file management (upload/download, versioning, soft delete, metadata, checksum validation), search functionality, audit logging, and a responsive UI with dashboards and real-time feedback.

Real-Time Collaborative Code Editor

Tools used: Java, Spring Boot, React.js, MySQL, Redis, WebSocket, Git

- **Developed a real-time collaborative code editor** that enables multiple users to edit the same document simultaneously using **Operational Transformation (OT)** for conflict-free synchronization.
- **Built a full-stack architecture** using **React (TypeScript), Spring Boot, Redis, WebSockets (STOMP/SockJS), and Docker**, providing low-latency, scalable real-time communication.
- **Implemented collaborative features** including live code synchronization, cursor tracking, text selection sharing, participant management, and in-session chat for seamless team collaboration.
- **Containerized the application using Docker Compose**, enabling one-command deployment of backend services and Redis while simplifying local development and environment consistency.
- **Integrated Redis** as an in-memory data store for session management and synchronization, improving scalability and ensuring efficient handling of concurrent collaborative sessions.

Education

Bachelor of Engineering in Computer Science

2023 – 2027

University Visvesvaraya college of Engineering

CGPA: 8.49

Class XII (PUC)

2021 – 2023

Shantiniketan PU College

Percentage: 95%

Class X

2021

Padmanjali English Medium High School

Percentage: 82.88%

Internship

Campus Champ Summer Internship

Campus Champ

- Enhanced communication, teamwork, and problem-solving skills through structured training and practical activities.
- Led a team in organizing and delivering presentations, demonstrating leadership and coordination abilities.
- Strengthened interpersonal, collaboration, and public speaking skills through active participation in group projects and discussions.
